

# Turn Your Old Speakers into New

Written By: Cekpi7

## TOOLS:

- [glue gun, soldering iron, rotary tool, screwdriver \(1\)](#)

## PARTS:

- [Battery, 9V \(1\)](#)

## SUMMARY

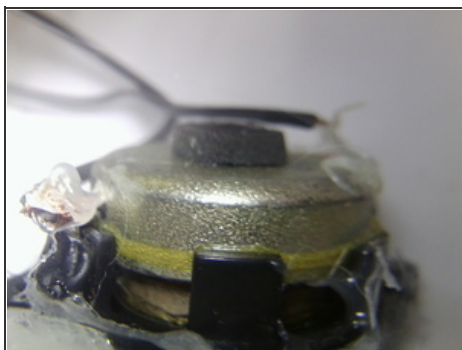

If you have an old computer speakers, you can turn them into speakers for phone or MP4.

## Step 1 — Turn Your Old Speakers into New

- Open your speaker.
- Cut the wire that goes from the transformer to the circuit board and connect it to the batteries (9V battery).

## Step 2

- You can insert new speakers if you want. I will add this little high-def.

## Step 3

- Cut the holes for new speakers or add another box with speakers.

## Step 4

- Glue the battery box to the back of speaker box. Watch [my speakers test](#).
